Changes to original specifications (Sheet 11)

- Moved functionality to Movie Detail Edit View Mode for simpler implementation
- Functionality is now embedded in the DatePicker, analogous to watchDate
- Default value of "today +14 days" temporarily not implemented. To Do in de/util/DateUtils.java, function `textToDate`, case `if("twoweeks".equals(str))`
    - then use it in layout/activity_movie_detail_edit.xml, <de.moviemanager.ui.view.DateSelectionView> to add the specification "app:date="twoweeks"
